

Thank you for your purchase!

Here are a few tips to extend the life of your garment.

Tip #1

Always wash in cold water.

Always.

Tip #2

Do not use bleach or other strong detergents.

Tip #3

Turn your clothes inside out before you wash and dry them.

This helps prevent fading and protects the printed or heat pressed design.

Tip #4

Do not put your clothes in a hot dryer.

High heat is the worst enemy of custom-printed apparel. We suggest letting your custom printed apparel air dry. And if you must use the dryer, choose the lowest setting and always remove the clothes from the dryer before they are completely dry. Finish drying by hanging up or laying out your garment.

Tip #5

Wash similar clothes together - color AND texture!

Never combine rough-textured items, like bath towels and items with zippers, with custom-printed apparel. Friction from rough towels rubbing against custom-printed garments could cause them to crack and peel.
